

ADDENDUM N°: 01

ISSUED AGAINST TENDER N° 113/NC/ICB/2023/2024/RMS OF VEHICLES FOR DISTRIBUTION OF MEDECINES TO RMS Ltd.

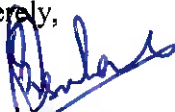

Subject: Clarification on technical specifications and extension of bids submission deadline

Considering the request for clarifications received from some bidders related to technical specifications mentioned in the tender document published on 07 March 2024, we would like to provide clarification:

#	Requested clarification on tender document	Amended specifications to be quoted by the bidders
1	3.5 tons truck will be with refrigerated container?	Yes, 3.5 tons truck will be with refrigerated container.
2	8 units: 4-5 tons trucks and 2 units: 17-20 ton trucks with container made in fibre glass materials are also refrigerated as you requested the ambient room to be in the range of 15-25°C?	we clarify that the 4-5 ton trucks and 17-20 ton trucks, their containers should be made of fiberglass material and insulated. Therefore, the container should not be refrigerated.
3	On base vehicle specification, is it a drive system of 4x4 required? And for which lot between 4-5 ton trucks and 3.5 ton trucks?	this was a typing error made on the base vehicle specification, that's why the 4x4 drive system is not mentioned in the detailed specification. Therefore, it should be 4x2 drive system for both 4-5 ton trucks and 3.5 ton trucks .

The deadline for bids submission for mentioned tender is extended up to 4th April 2024. Other clauses which are not mentioned in this addendum N° 1 remain unchanged as announced in initial tender document.

Sincerely,

**Dr. LOKO Abraham
Chief Executive Officer**
